

VISION

- Integrated 2D or 3D product recognition for reliable product handling.
- Optional quality check

INTEGRATED ROBOTICS

- Robot controls and HMI integration in process line controls
- Inhouse development and service

ADDED VALUE

- Product & production stabilization for labor intensive processes
- Productivity at the highest level
- Quality-controlled product sorting possibilities
- Simulation / pre-order test facilities available at Rademaker (The Netherlands)

EXCELLING IN PRODUCTIVITY

THE KEY IS IN THE GRIPPER

- Quick release system for grippers
- EASY-TO-USE*

Quick release mechanism for fast and easy change overs

- In house design and production of various gripping possibilities

Dough

Fruit

Sausages

Chocolates

APPLICATIONS

Solid depositing

Product depositing

Product shaping

Quality sorting

- Small footprint
- Large working area
- Hygienic design (IP69K)
- 3 to 5 degrees of freedom
- Up to 80 cycles per minute
